

## Problem we're solving

Fertility clinics have become call centres. Staff are stretched fielding a high number of non-urgent patient enquiries wasting on average 3.5 hours per day

Why? Clinics lack a personalised, accurate and accessible way to deliver information to patients

## Our Solution

Patient Mobile App

Electronic Patient Record (EPR) Software

Clinic Dashboard

Salve's clinic branded app integrates to your EPR to provide relevant treatment information into patient hands

**In guiding patients through treatment, Salve reduces clinic administration costs and improves medical outcomes**

## Benefits for Clinics

### More time for quality care

Answer patient queries upfront & save staff call time by providing patients with personalized and paperless treatment info

### Adherence monitoring

Be confident in patient compliance (especially at trigger shot). Ensure egg collection at the right time

### Secure patient messaging

Turn 20 minute phone calls into 30 second, 'Whatsapp-like' messages. Delight patients by answering their queries instantly and securely

## Benefits for Patients

### No more Dr. Google

Reduce calls from patients confused by conflicting information. Salve delivers clinic-vetted treatment information when patients need it

### Never miss a dose

Automated drug and appointment reminders to ensure compliance and improve success rates

### Secure/private clinic messaging

Patients communicate with your clinic discreetly. Treatment support fits around their lives

## Benefits for Clinic Ownership

### Clinic branded tech

When a patient downloads Salve, they enjoy a branded mobile experience increasing your brand awareness and value. You can include your clinic's video content, from injection teach videos to doctor interviews

### Clinic group data insights

Salve's dashboard displays which drugs are driving high levels of adherence and delivering better outcomes. Salve helps drive standardized best practice across all clinics

### Multi-language support

Via our CMS you can provide treatment information in whatever language you choose to suit the needs of your customers

### Scale efficiently

Scale staff efficiencies by digitizing and standardizing patient support processes in clinics

## Who we're working with

*"Salve helps our patients keep on track with their treatment and medication. Our patients, who are using Salve, are taking ownership of their cycle and delivering positive feedback"*

*Salve Customer*

## EPR integrations

We can integrate easily with any Electronic Health Record provider
